Claims 1-10 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art does not disclose a charged particle beam exposure apparatus wherein a sample stage is loaded with a sample on which an image formed from the beam is projected to expose second marks near first alignment marks already provided on the sample, an incident energy control circuit that changes the incident energy of the charged particle beam after the second marks are formed so that the beam is scanned over the sample at a different incident energy and a detector detects electron signals generated from a region including the first and second marks, a calculation circuit which calculates a positional shift amount between said plurality of first marks and said plurality of second marks from said detected electron signal, a correction circuit which corrects positions of said plurality of first marks on said sample based on said calculated positional shift amount, and an exposure control circuit which aligns said desired pattern based on corrected positions of said plurality of first marks.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

This application is in condition for allowance except for the presence of claims 11 to 20 non-elected without traverse. Accordingly, claims 11 to 20 have been cancelled.
